

# SIGN SHOP & SCENIC ART

For more than ninety years the Warner Bros. Sign Shop and Scenic Art Department have been industry leaders for feature, television and commercial production. Addressing the trends of an ever-changing marketplace, we have merged the creative and technical resources to form one group.

The Shop is a 12,000-square-foot facility. It encompasses a dedicated graphic design studio, large-format UV digital print and seaming space, two router rooms, a plotter room, a paint booth, extensive production space, and a scenic painting area.

The Shop incorporates state-of-the-art technologies for sign and scenic art along with the traditional applications.
